

Hi Gord,

I went to a very popular spring on the Tilton Barrens last week to get water and this is what I and everyone else had to look at. This in-discriminate dumping is shocking.... These people know exactly what they are doing. If we are going to get young people involved in hunting they have to be better stewards than their parents in a lot of cases. What is it going to take to rid this province of this carnage a Compliance Officer? Our fellow Newfoundlander's are dumping their garbage right alongside of the spring while they are getting water. That is F..... ed up! "Like I said" a very popular spring right alongside of the highway is a pigs pen. As the editor of such a fine magazine we have to protect our wild heritage whether we hunt or not. This is gone on too long. Issue big fines??

Who is cleaning up this mess?? Our politicians!
